RANKING LIST **MEDICINE IN ENGLISH (IMAT)**

NATIONAL RANKING LIST

Medicine in English (IMAT) 2025

What's in this document?

- Legend -2024 National Rankings
- Instructions for interpreting data of the 1st IMAT ranking round
- Predicted minimum positions
- Summary data – 1st IMAT assignment

Legend – National Rankings

- To remain in the ranking list for the next update, it is necessary to **confirm your interest** in the dedicated box on your University personal area.
- By confirming your interest, you ensure that you remain in the ranking to wait for a place or a better placement.

THIS MUST BE DONE AFTER EVERY RANKING UPDATE.

- **ASSIGNED candidates** must enroll (within four working days) at their first-choice university according to the procedures indicated by the university.
- **RESERVED candidates** may enroll or wait (by confirming their interest to stay in the ranking). Their place will not be taken away, and they might move “upwards” in their list of preferences.
- **WAITLISTED or END OF PLACES** candidates can only wait, in the hope that withdrawals by higher-ranked students will allow the ranking to move down to them.

The test in summary

Maximum score → 87 points, achieved by an international candidate for the Milan campus.

Last reserved for Medicine → position 1149 (54.8 points)

Last reserved for Dentistry → position 1172 (54.6 points)

Last reserved for Veterinary Medicine → position 1282 (53.8 points)

Average score → 42.09 points (positions 3400–3500)

IMAT 2024 Rankings

In the tab above, you can view the progression of the various Medicine in English campuses during the 2024 ranking updates. Only the most significant updates are shown—one in October and then one per month thereafter.

IMAT 2024: Ranking List Updates

Tables of Applicant Positions and Position Changes Following the 1st, 2nd, and 6th Ranking List Updates

University	Total seats	N0	N1	Delta N1/0	N2	Delta N2/0	N6	Delta N6/0

PREMISES:

- From this point on, the **scores** related to ranking **positions** lose statistical significance; we will therefore refer mainly to the positions themselves.
- The number of available seats has **increased by 9.2%** from 2024 to 2025 — from 960 to 1049: 952 for Medicine, 52 for Dentistry, and 45 for Veterinary Medicine (+89 total).
- The number of eligible EU candidates (thus appearing in the ranking) has **increased substantially**, from 5,609 (IMAT 2024) to 7,202 (IMAT 2025)
- In the early rounds, we might see changes in the number of seats per campus, due to nationality verification issues of residents in Italy. Hence, current data are **not yet definitive**.

First IMAT Round - October 13rd 2025

The first thing that stands out is a **drastic increase** in the number of candidates who scored above 20 and thus entered the ranking (7,202 in 2025 vs. 5,609 in 2024 vs. 3,467 in 2023). Despite this increase, the **average score** remains roughly consistent with last year (42.09 in 2025 vs. 44.90 in 2024).

Given the “filter semester” situation, **withdrawal rates are expected to remain low**, as in 2024. This would lead to **limited but prolonged ranking updates**, continuing for several months. This mainly applies to Medicine and Dentistry in English; Veterinary Medicine requires separate evaluation.

HOW TO USE THE LISTS BELOW (ONLY FOR THE FIRST ASSIGNMENT)

Look at your **position** and the **last admitted position** for the university/universities you are interested in (those higher up in your preference list).

See 2025 Tables: “List of last admitted positions – first assignment”

Then calculate the **distance between your position and the last admitted position** of your target university:

- If you are **within 50 positions**, it is **likely** that you will move up to that university in the first few updates.
- If you are **between 50 and 150 positions away**, there is a **high probability (but not certainty)** that you will move up during the ranking period.
This depends both on the **number of withdrawals** (unpredictable) and the **order of your choices**.
- If you are **150–300 positions below** the current last admitted candidate of your desired campus, it is **possible (but far from certain)** that you might obtain a seat by the end of the ranking period.

Some campuses (though not many) may move down **more than 300 positions** by the final updates, but it's impossible to predict which.

Again, much depends on the **number of withdrawals** and **the order of your preferences**.

Note:

Since the ranking has **not been cut off prematurely** in recent years, we consider it likely that it will again continue until all places are filled this year.

Our forecasts therefore extend **until summer 2026**.

Generally, it makes sense to wait for a place **until the end of the first semester or slightly beyond (March–April at most)**; however, personal choices also come into play, which we can discuss during a consultation.

Additional notes:

- For **Medicine**, we expect the **last campuses to fill up** (as in 2024) to be **Messina** and **Cagliari**.
- The two **Dentistry** campuses show very different trends: **Siena** is expected to keep moving for a long time, while **Rome** will likely fill up much sooner.

The **2024 short-, medium-, and long-term tables** displayed at the top of this doc will help you understand the progression of the national ranking up to that point.

Based on these considerations, we can currently estimate:

For **MEDICINE**:

We expect Medicine campuses to reach around **positions 1350–1550** in the national ranking.

For **DENTISTRY**:

We expect Dentistry campuses to reach around **positions 1450–1650** by late summer 2025.

For **VETERINARY MEDICINE**:

Veterinary campuses currently include the **last reserved candidates** in the ranking.

We expect the situation to remain similar during the updates, with rankings **continuing for a long time**. It is not yet possible to make accurate predictions, as this is the **first year** Veterinary appears in the IMAT ranking.

LIST OF CUTOFFS – FIRST ROUND ALPHABETICAL ORDER

University	Total seats	Last admitted score	Last admitted position
Bari	69	56,5	965
